SUMMARY

Full-stack web developer experienced in building APIs and responsive web applications with Laravel, Django, Vue.js, Nuxt.js, and Laravel Blade. Skilled in MySQL and PostgreSQL database design, migrations, query optimization, recurring payments, transaction logging, and Python-based web scraping.

WORK EXPERIENCE

Backend-Web Developer, Ussat Engineering **Mar 2023 - Feb 2024 (1 yr)**

- Built and supported a B2B platform with Laravel, focusing on secure handling of high-traffic workflows and large data volumes
- Improved application performance by optimizing database queries and applying Laravel caching mechanisms to reduce page-load times
- Developed responsive user interfaces with Laravel Blade and Bootstrap, improving usability across screen sizes.

Full-Stack Web Developer, Takyk Ulgam **Mar 2024 - Jun 2025 (1.3 yr+)**

- Designed and implemented APIs with Laravel and Django.
- Designed databases, created migrations, and optimized queries with MySQL and PostgreSQL
- Built dynamic, responsive user interfaces with Vue.js and Nuxt.js.
- Designed and implemented web-scraping tools in Python using Scrapy.
- Developed recurring-payment, refund, and transaction-logging features.

Full-Stack Web Developer, Onliner **Jun 2025 - Present (1.5 yr+)**

- Designed and implemented a multi-tenant SaaS platform for appointment and salon management using Laravel and Nuxt.js (SSR), with role-based access for clients, salon admins, salon masters, and super admins
- Developed a queue-based subscription system with concurrency locking, idempotency handling, and automated status updates via model observers
- Designed and implemented an admin analytics dashboard backed by aggregate database tables, including a client lifecycle classification system (new/regular/at-risk/lost) and a weighted staff performance scoring algorithm
- Configured and optimized production deployment with PM2 (SSR/static, fork/cluster), implemented Cloudflare and Redis caching layers, and automated scheduled backend tasks using Laravel Artisan commands
- Resolved 300+ production issues and bugs, including a UTF-8 encoding issue affecting Laravel JSON API responses
- Integrated Model Context Protocol (MCP) to seamlessly connect AI models with internal services and context sources.

EDUCATION

LaunchLife Bootcamp **Mar 2022 - Sep 2022 (6 mos)**

Front-end Development

Gujurly Nesil **Dec 2022 - May 2023 (6 mos)**

Back-end Development

ADDITIONAL INFORMATION

Technical Skills: Backend: Laravel, Django, PHP • Frontend: Vue.js, Nuxt.js, Laravel Blade, JavaScript, Bootstrap • Databases: MySQL, PostgreSQL; database design, migrations, query optimization • Web scraping: Python, Scrapy • Features: recurring payments, refunds, transaction logging • Security and delivery: authentication, security, DevOps, deployment • Collaboration: version control and collaboration, Git and GitHub/GitLab workflows, Automated testing.

Languages: English, Russian, Turkish, Turkmen.

Volunteering: Student Mentor — American Councils for International Education, Volunteer Assistant — UNDP, Volunteer English Teacher — Local School.
